Airtribe

Effective Communication as a PM

Sri Mandir

Project Brief:

Scenario:

You are a Product Manager (PM) at Sri Mandir, a devotional app from India dedicated to helping devotees in their spiritual and devotional journey. You are in charge of monetization for the app. You recently launched a paid premium plan on Sri Mandir, which was a success. However, you have noticed that not enough people are renewing their subscriptions. The hypothesis is that adding personalized discount nudges will help convert people who are unsure about renewing their subscriptions.

Assignment:

Draft a PRD to implement and test the personalized discount nudge feature, aiming to enhance the subscription renewal rate.

➔ Your job is to document and communicate it succinctly to the design & engineering teams *(please try to cover as many details as possible)*

1. Description:

What is it?

Personalized discount nudges are targeted notifications that offer tailored discounts to users whose subscriptions are about to expire. These notifications aim to encourage users to renew their subscriptions by providing personalized incentives based on their app usage and engagement levels.

---

2. Problem :

What problem is this solving?

Our subscription renewal rate for Sri Mandir premium plan is lower than expected. Users are not renewing their subscriptions as often as we would like, indicating a need for additional motivation to retain them.

---

3. Why..?

How do we know this is a real problem and worth solving?

- **Data Analysis**: Our renewal rates are below industry benchmarks, and user feedback indicates uncertainty about the value of renewing.
- **User Feedback**: Users have expressed interest in receiving special offers and incentives to continue their subscriptions.
- **Market Trends**: Other subscription-based apps have successfully used personalized offers and discounts to increase retention and engagement.

---

4. Target Audience :

Who are we building for?

- **Existing Premium Subscribers**: Users whose subscriptions are about to expire.

- **Potential Churners**: Users who have shown signs of reduced engagement and are at risk of not renewing.
- **Engaged Users**: Highly active users who may be incentive by a small discount to renew.

---

5. User persona :

[Please do find User persona here.]

6. User Stories :

User Story 1: Personalized Discount Notification

As a user, I want to receive a personalized discount offer when my premium subscription is about to expire so that I feel valued and motivated to renew without financial strain.

Acceptance Criteria:

- **Notification Timing**: Receive notifications 7 days, 3 days, and 1 day before the subscription expires.
- **Discount Offer**: The notification includes a personalized discount offer based on my engagement level and subscription history.
- **Engaging Message**: The message includes a quote or spiritual motivation that resonates with my app usage.

User Story 2: Inspirational Content in Renewal Notification

As a user, I want my renewal notification to include inspirational content, reminding me of the benefits of the premium plan for my spiritual growth and engagement.

Acceptance Criteria:

- **Inspirational Content**: The notification message includes an uplifting quote or message relevant to my spiritual journey.
- **Relevance**: The content is aligned with my recent app usage or interests.
- **Emphasis on Benefits**: The message highlights the benefits and enhanced features available with the premium plan.

User Story 3: Seamless Renewal Process

As a user, I want the process of renewing my subscription to be smooth and quick, so that I can continue enjoying the premium features without interruption.

Acceptance Criteria:

- **Direct Link**: The notification provides a direct link to the renewal page.
- **User-Friendly**: The renewal process is simple and takes no more than a few clicks.
- **Confirmation**: I receive a confirmation message upon successful renewal.

User Story 4: Sense of Community and Support

As a user, I want to feel a sense of community and support from the Sri Mandir app, encouraging me to renew my subscription to stay connected with like-minded devotees.

Acceptance Criteria:

- **Community Features**: The renewal notification highlights the community features of the app.
- **User Testimonials**: It includes a testimonial or story from another user about the benefits of the premium plan.
- **Feeling Valued**: The message makes me feel appreciated and part of a supportive community.

User Story 5: Visually Appealing Notifications

As a user, I want the discount nudges to be visually appealing, reflecting the app's spiritual and devotional theme, enhancing my decision to renew my subscription.

Acceptance Criteria:

- **Design**: The notifications feature serene and visually appealing designs that reflect the app's devotional theme.
- **Engaging Content**: The messages incorporate spiritually uplifting quotes or scriptures tailored to my interests.
- **Emphasis on Benefits**: The notifications emphasize the spiritual benefits and enhanced features of the premium plan, making the renewal decision feel meaningful and connected to my spiritual journey.

User Story 6: Tailored Discounts Based on Engagement

As a user, I want the discount offers to be tailored to my engagement level and app usage patterns, so that the incentives feel personalized and relevant.

Acceptance Criteria:

- **Engagement Analysis**: Discounts are determined based on my app usage and engagement history.
- **Personal Relevance**: The discount offer reflects my level of activity and devotion within the app.
- **Effective Incentives**: The personalized discount provides a compelling reason for me to renew my subscription.

User Story 7: Timely Reminders

As a user, I want to receive timely reminders about my upcoming subscription expiration and available discounts, so that I have ample time to consider and act on the offer.

Acceptance Criteria:

- **Advance Notice**: Notifications are sent at strategic intervals before the subscription expires.
- **Clear Information**: The reminders clearly communicate the expiration date and available discount.
- **Call to Action**: Each reminder includes a clear and compelling call to action to renew the subscription.

User Story 8: Feedback and Improvement

As a user, I want to provide feedback on the discount offers and renewal process, so that the app can continually improve and better meet my needs.

Acceptance Criteria:

- **Feedback Mechanism**: A simple and accessible way to provide feedback on the discount nudges and renewal experience.
- **Responsive Improvements**: The app team reviews and acts on feedback to enhance future notifications and offers.
- **User Satisfaction**: My feedback contributes to a more satisfying and effective renewal process for all users.

7. What..?

Roughly, what does this look like in the product?

- **User Segmentation**: Identify and segment users based on their app usage, engagement levels, and subscription history.

- **Discount Offers**: Create tiered discount offers (e.g., 10%, 20%, 30%) tailored to different user segments.
- **Notification Channels**: Deliver personalized discount nudges through in-app messages, emails, and push notifications.
- **Spiritual Touch**: Include spiritual and motivational quotes in the notifications to align with the app's theme and resonate with users' devotional journeys.
- **UI/UX**: Design visually appealing and spiritually themed notifications that reflect the app's aesthetic.

8: What are the Success Key Metrics..?

- Subscription Renewal Rate :The percentage of users who renew their subscription after receiving personalized discount nudges.
- Click-Through Rate (CTR): The percentage of users who click on the discount notification.
- Conversion Rate:The percentage of users who complete the renewal process after clicking on the discount notification.
- Discount Redemption Rate :The percentage of users who redeem the discount offer during the renewal process.
- User Engagement :The level of interaction users have with the app's content and features after receiving a discount nudge.
- Customer Satisfaction :The level of user satisfaction with the discount offers and renewal process.
- Churn Rate :The percentage of users who do not renew their subscription despite receiving discount nudges.
- Revenue Impact :The effect of personalized discount nudges on the overall revenue from subscriptions.

- A/B Testing Results :Performance metrics of different versions of discount nudges tested through A/B testing.
- Notification Delivery Rate: The percentage of notifications that are successfully delivered to users.

9. Challenges :

Sl.No	Category	Challenges	Solutions
1	Personalization Complexity	Ensuring that users are accurately segmented based on their engagement and subscription history to receive the most relevant discounts.	Continuously refine segmentation algorithms and validate with real user data. Regularly update user profiles to reflect their current engagement and preferences.
2	Personalization Complexity	Creating personalized discount offers that are meaningful and appealing to diverse user segments, including those with different spiritual practices and financial constraints.	Use advanced data analytics and machine learning to tailor offers based on user behavior and preferences. Collaborate with spiritual experts to ensure the offers align with users' devotional practices.
3	Balancing Discount Value	Determining the optimal discount value that motivates renewals without significantly impacting revenue.	Conduct A/B testing to evaluate the effectiveness of different discount levels and adjust based on performance data. Ensure discounts are strategically aligned with user segments.
4	User Engagement and Retention	Maintaining user engagement and ensuring that the nudge feature does not lead to over-reliance on discounts for retention.	Combine discount nudges with other engagement strategies, such as new content updates and community features, to keep users interested and connected
5	Cost Management	Managing the cost implications of offering personalized discounts while maintaining profitability.	Monitor the financial impact of discount offers and adjust strategies to balance cost and revenue. Use data to identify the most cost-effective discount strategies.
6	Measuring Effectiveness	Accurately measuring the impact of the personalized nudge discount feature on subscription renewals and overall app performance.	Establish clear metrics and KPIs for tracking the success of the feature. Use data analytics to evaluate performance and make data-driven decisions.

7	Technical Implementation	Integrating the discount nudge feature with existing app infrastructure and ensuring smooth functionality across different devices and platforms.	Collaborate closely with the engineering team to develop and test the feature thoroughly. Implement robust error handling and fallback mechanisms to address any technical issues.
8	Regulatory Compliance	Ensuring that the discount feature complies with data privacy regulations and industry standards.	Work with legal and compliance teams to ensure that user data is handled securely and that all communications adhere to relevant regulations.

10. How..?

What is the experiment plan?

Phase 1: Research and Planning (2 Sprint)

- Finalize user segments and discount rules.
- Design UI/UX mock ups for notifications.

Phase 2: Development (3-4 Sprint)

- Implement user segmentation and discount engine.
- Develop and integrate the notification system.
- Set up the analytic dashboard for tracking.

Phase 3: Testing and Optimization (2 Sprint)

- Conduct internal testing of discount nudges.
- A/B test with a small user group to optimize messaging and discount levels.
- Gather feedback and make necessary adjustments.

Phase 4: Launch and Monitoring (Ongoing)

- Roll out personalized discount nudges to all users.
- Continuously monitor performance and adjust strategies based on data and user feedback.

11 Sprint points and resources required for this feature:

Designations of Resources	No of resources	Sprint points
APM	1	2
Jr Designer	1	2
Software Developer	1	
QA	1	
Total	4	

Future thoughts on this feature :

1. **Advanced Personalization:**

- **AI and Machine Learning**: Leverage AI to refine user segmentation and personalize discount offers more precisely. Machine learning algorithms can predict user behavior and preferences, leading to more effective nudges.
- **Behavioral Insights**: Use advanced analytics to gain deeper insights into user behavior and refine discount strategies based on evolving engagement patterns.

2. **Integration with Broader User Experience**

- **Holistic Experience**: Integrate discount offers with other aspects of the app experience, such as personalized content recommendations and spiritual growth paths.
- **Cross-Feature Promotion**: Utilize the discount feature to promote other app features or events, creating a cohesive and enriching user experience.

3. **Dynamic Discounting**

- **Real-Time Adjustments**: Implement dynamic discounting that adjusts offers in real-time based on user activity, engagement trends, and external factors like seasonal events or special occasions.
- **Contextual Discounts**: Offer contextual discounts tied to specific user milestones or achievements within the app.

4. **Enhanced User Engagement**

- **Interactive Notifications**: Develop interactive notifications that allow users to engage directly with the offer, such as through quick actions or in-app mini-surveys.

- **Gamification**: Incorporate gamified elements, such as reward points or badges, to make the renewal process more engaging and incentivizing.

5. **Feedback and Adaptation**

- **Continuous Feedback Loop**: Establish ongoing mechanisms for collecting user feedback on the discount feature and make iterative improvements based on user input.
- **Adaptive Strategies**: Regularly update discount strategies based on performance data, user feedback, and changing market trends.

6. **Global and Cultural Considerations**

- **Localization**: Expand localization efforts to cater to a global audience, ensuring that discount offers are culturally and regionally relevant.
- **Diverse Spiritual Practices**: Customize discount content to align with a diverse range of spiritual practices and beliefs within the app's user base.

7. **Integration with CRM and Marketing**

- **CRM Integration**: Integrate the discount feature with customer relationship management (CRM) systems to track user interactions and tailor offers based on comprehensive user profiles.
- **Marketing Campaigns**: Align discount offers with broader marketing campaigns and initiatives to maximize reach and impact.

8. **Ethical Considerations**

- **Transparency**: Maintain transparency about how user data is used for personalization and ensure users are aware of how discounts are generated.
- **Respect for Spiritual Values**: Ensure that discount offers and related content respect and uphold the spiritual values and beliefs of the user base.

9. **Scalability and Performance**

- **Scalability**: Design the feature to scale efficiently with the growing user base and increasing data volumes.
- **Performance Monitoring**: Continuously monitor performance metrics and system load to ensure reliable delivery of discount notifications.

10. **Long-Term Strategic Alignment**

- **User Retention Strategy**: Align the discount feature with broader user retention and engagement strategies to ensure it contributes to long-term goals.
- **Product Roadmap**: Integrate insights gained from the discount feature into the overall product roadmap and future feature development.

12. When..?

When does it ship and what are the milestones?

- **Start Date**:29/07/2024
- **Milestone 1**: Complete research and planning (2 weeks)
- **Milestone 2**: Finish development of segmentation, discount engine, and notification system (4 -5 weeks)
- **Milestone 3**: Complete testing and optimization (2-3 weeks)
- **Milestone 4**: Full launch of personalized discount nudges (Ongoing monitoring and optimization)

13. Conclusion:

the personalized nudge discount feature has the potential to significantly enhance user engagement and subscription renewal rates for the Shri Mandir app. By addressing the outlined challenges and focusing on continuous improvement, the app can foster a more engaged and loyal user base, while effectively supporting users in their spiritual journeys.
